IMAGE ON THE IPAD

A SPECIAL THANK YOU MOVIE  
WILL PLAY IF ALL THE MOVIES  
HAVE BEEN CLICKED.

## **CONSIDERATIONS/QUESTIONS**

There will be sound playback - perhaps only from the console iPad which will connect to a speaker?

How will we output to the 47" inch screen? Do we need a separate iPad mini? or can the server also do playback. What is more robust?

IF so can we see the iPads connected through an other iPhone screen?

Format of movie? Resolution? Pieces? Auto connect after wifi signal loss?

## **DESIRED METRICS**

Number of times system was activated

Average usage time

Most selected button

A log of the time of day of each user used

Questions : What kind of format can we output this data in so that it is easily processed?
